

UI Copywriting Lab Report

Project: Fashion E-commerce Application UX Writing Improvement

Domain: UI/UX Design

Company: CODTECH IT SOLUTIONS

Created By: Soniya Sahu

1. Introduction

UI Copywriting is an important part of User Experience Design that focuses on writing clear and meaningful text inside digital products. This project improves fashion e-commerce app messages to create a better user experience.

2. What is UI Copywriting?

UI Copywriting means creating user-friendly text that appears in an application interface.

It includes:

- Button labels
- Error messages
- Success messages
- Empty states
- Notifications

Good copy helps users understand actions clearly.

3. Importance of UX Writing

UX Writing improves communication between the product and users.

Benefits:

- Reduces confusion
- Builds trust
- Provides clear guidance
- Improves engagement
- Makes products easier to use

4. Before vs After Copy Improvements

Login Error:

Before: Login Failed

After: Oops! We couldn't log you in. Please check your details and try again.

Empty Wishlist:

Before: No Items

After: Your wishlist is waiting. Save your favourite styles here.

Empty Cart:

Before: Cart Empty

After: Your cart feels lonely. Explore latest trends and add your favorites.

Success Message:

Before: Done

After: Great choice! Your item has been added successfully.

Button Text:

Before: Submit

After: Complete My Order

5. Design Decisions

The copy improvements were designed by focusing on:

- Simple language
- Friendly tone
- Clear instructions
- Emotional connection
- Action-focused communication

These decisions help create a smooth and user-centered shopping experience.

6. Conclusion

UI Copywriting improves digital experiences by making communication simple and effective.

Clear UX writing helps users complete tasks confidently and creates a positive connection with the product.
